

Steele High School Science Department Philosophy

High School science courses are inherently rigorous due to ongoing research and massive quantities of information discovered each year. Our goal is to challenge your student academically, foster student responsibility and set high standards of expectations so each student may reach his/her individual potential and be prepared for their career choice.

Accompanying this paper, you will find documents that outline what we require of your student. If you have any questions or concerns about these policies, or have an extenuating circumstance arise during the year that could affect your student's performance, we encourage you to contact us as soon as possible through e-mail, note, or phone call. Arrangements can be made on a case by case basis if a circumstance arises that causes a conflict with the attached policies.

All policies and procedures from the High School Student Handbook will also be followed in all of our courses.

It is our goal that every Steele High School student has a safe and successful year. Thanks you for entrusting us with your student's education.

Scott Thomas - Department Leader
